WHAT DOES “STAGES OF COMFORT” REALLY MEAN?

Sometimes you just feel “too hot” or “too cold” between cycles of your system. Having up to 750 levels of speed nearly eliminates temperature fluctuations. Your system glides along as if on cruise control, barely sipping electricity for much of the day. It also runs at lower speeds for longer periods of time offering:

- ✓ **Better temperature control**
- ✓ **Better humidity control**
- ✓ **Better air filtration**
- ✓ **Quieter than traditional systems**
- ✓ **Lowest cost per minute**

SEET™ TESTED

Every Trane system is put through some of the most extreme conditions found in nature in our SEET™ [Systems Extreme Environmental Test] lab. Put through five years of extreme wear and tear in just a few months, our products can stand up to the harshest environments imaginable.
