# Data sheet

This section makes it easier for you to specify and order a TR1 Series VFD.

## Choice of frequency converter

The frequency converter must be chosen on the basis of the present motor current at maximum loading of the unit. The frequency converters rated output current  $I_{INV}$  must be equal to or greater than the required motor current.

### Mains voltage

TR1 Series VFD is available for two mains voltage ranges: 200-240 V and 380-480 V.

- 1 x 220 - 240 V single-phase AC voltage
- 3 x 200 - 240 V three-phase AC voltage
- 3 x 380 - 480 V three-phase AC voltage

Select whether the frequency converter is connected to a mains voltage of:

### 1 x 220 - 240 Volt mains voltage

Type	Typical shaft output $P_{INV}$	Max. constant output current $I_{INV}$	Max. constant output power at 230 V $S_{INV}$	
	[kW]	[HP]	[A]	[kVA]
2803	0.37	0.5	2.2	0.9
2805	0.55	0.75	3.2	1.3
2807	0.75	1.0	4.2	1.7
2811	1.1	1.5	6.0	2.4
2815	1.5	2.0	6.8	2.7

### 3 x 200 - 240 Volt mains voltage

Type	Typical shaft output $P_{INV}$	Max. constant output current $I_{INV}$	Max. constant output power at 230 V $S_{INV}$	
	[kW]	[HP]	[A]	[kVA]
2803	0.37	0.5	2.2	0.9
2805	0.55	0.75	3.2	1.3
2807	0.75	1.0	4.2	1.7
2811	1.1	1.5	6.0	2.4
2815	1.5	2.0	6.8	2.7
2822	2.2	3.0	9.6	3.8
2840	3.7	5.0	16.0	6.4

## Data sheet

### 3 x 380 - 480 Volt mains voltage

Type	Typical shaft output $P_{INV.}$	[kW]	[HP]	Max. constant output current $I_{INV.}$	Max. constant output power at 400 V $S_{INV.}$
2805	0.55	0.75		1.7	1.1
2807	0.75	1.0		2.1	1.7
2811	1.1	1.5		3.0	2.0
2815	1.5	2.0		3.7	2.6
2822	2.2	3.0		5.2	3.6
2830	3.0	4.0		7.0	4.8
2840	4.0	5.0		9.1	6.3
2855	5.5	7.5		12.0	8.3
2875	7.5	10.0		16.0	11.1
2880	11	15		24	16.6
2881	15	20		32	22.2
2882	18.5	25		37.5	26.0

#### Enclosure

All TR1 Series VFD units are supplied with IP 20 enclosure as standard. This enclosure level is ideal for panel mounting in areas where a high degree of protection is required; at the same time IP 20 enclosures allow side-by-side installation without any need for extra cooling equipment. IP 20 units can be upgraded to NEMA 1 by fitting a terminal cover.

In addition, TR1 2880-82 units are supplied with Nema 1 enclosure as standard.

#### Brake

TR1 Series VFD is available with or without an integral brake module. See also the section entitled *Brake resistors* for ordering a Brake resistor.

#### RFI filter

TR1 Series VFD is available with or without an integral 1A RFI-filter. The integral 1A RFI filter complies with EMC standards EN 55011-1A.

With an integral RFI filter there is compliance with EN 55011-1B with a max. 15-metre

screened/armoured motor cable on TR1 2803-2815 1 x 220-240 Volt.

TR1 2880-82 with integral 1B filter comply with EMC standard EN 50011 - 1B

#### Harmonic filter

The harmonic currents do not affect power consumption directly, but they increase the heat losses in the installation (transformer, cables). That is why, in a system with a relatively high percentage of rectifier load, it is important to keep the harmonic currents at a low level so as to avoid a transformer overload and high cable temperature. For the purpose of ensuring low harmonic currents, TR1 2822 3 x 200-240 V and TR1 2805-2882 380-480 V are fitted with coils in their intermediate circuit as standard. This reduces the input current  $I_{RMS}$  by typically 40 %. Please note that 1 x 220-240 V units are not supplied with coils in their intermediate circuit.

#### FC protocol

TR1 Series VFD frequency converters are able to fulfill many different functions in a monitoring system. The frequency converter can be integrated directly in an overall surveillance

## Data sheet

---

system, which will allow detailed process data to be transferred via serial communication. The protocol standard is based on an RS 485 bus system with a maximum transmission speed of 9600 baud. The following Drive profiles are supported as standard:

- FC Drive, which is a profile adapted to TR1.
- Profidrive, which supports the profidrive profile.

See *Serial communication* for further details of telegram structure and Drive profile.

---

TR1 Software Dialog can be used on the Sub D plug.

---

### **Fieldbus option**

The increasing information requirements in industry make it necessary to collect or visualize many different process data. Important process data help the system technician with the daily monitoring of the system. The large amounts of data involved in major systems make a higher transmission speed than 9600 baud desirable.

### **Profibus**

Profibus is a fieldbus system, which can be used for linking automation devices such as sensors and actuators with the controls by means of a two-conductor cable. Profibus DP is a very fast communication protocol, made specially for communication between the automation system and various types of equipment.  
Profibus is a registered trade mark.

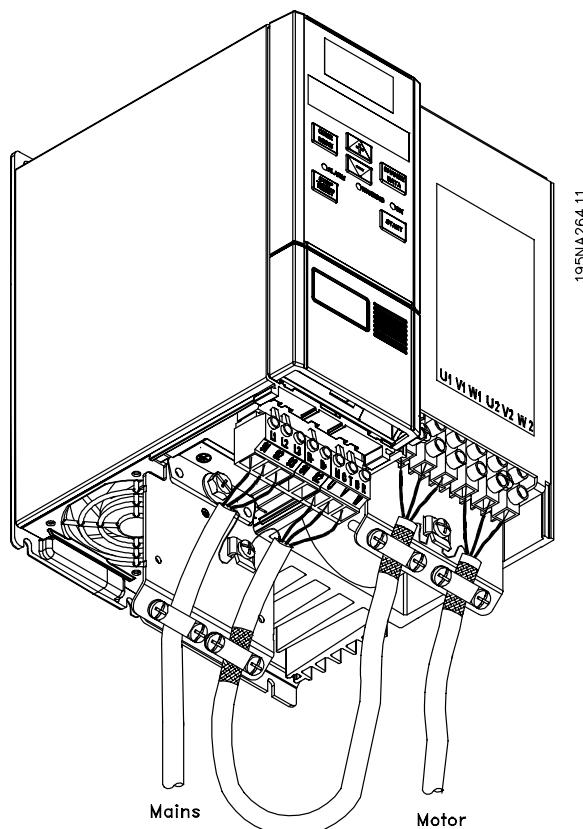

### **DeviceNet**

DeviceNet fieldbus systems can be used for linking automation devices such as sensors and actuators with the controls by means of a fourwire conductor cable.  
DeviceNet is a medium speed communication protocol, made specially for communication between the automation system and various types of equipment.  
Units with DeviceNet protocol cannot be controlled by FC protocol and Profidrive protocol.

## Motor coils

By fitting the motor coil module between the frequency and the motor it is possible to use up

to 200 metres of unscreened/unarmoured motor cable or 100 metres of screened/armoured motor cable. The motor coil module has an enclosure of IP 20 and can be installed side-by-side.

## Technical data for TR1 28032875 Motor coils

Max. cable length (unscreened/unarmoured) <sup>1)</sup>	200 m
Max. cable length (screened/armoured) <sup>1)</sup>	100 m
Enclosure	IP 20
Max. rated current <sup>1)</sup>	16 A
Max. voltage <sup>1)</sup>	480 V AC
Min. distance between TR1 and motor coil	Side-by-side
Min. distance above and below motor coil	100 mm
Dimensions H x W x D (mm) <sup>2)</sup>	200 x 90 x 152
Weight	3.8 kg

<sup>1)</sup> Parameter 411 *Switching frequency* = 4500 Hz.

<sup>2)</sup> For mechanical dimensions see under *Mechanical dimensions*.

## RFI 1B filter

All frequency converters will cause electromagnetic noise in the mains supply when they are operating. An RFI (Radio

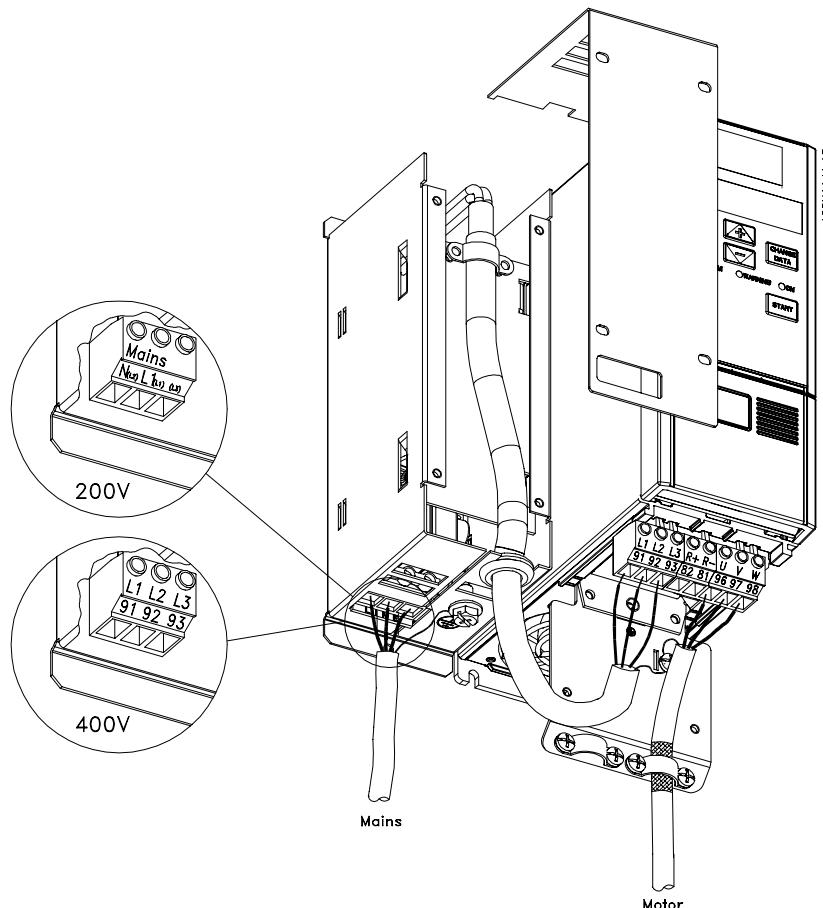

Frequency Interference) filter will reduce the electromagnetic noise in the mains supply. Without an RFI filter there is a risk that a frequency converter will disrupt other electrical

components that are connected to the mains and might thus cause operating disruption. By fitting an RFI 1B filter module between the mains supply and the TR1 Series VFD, the TR1 Series VFD complies with the EMC norm EN 55011-1B.

### NBI:

To comply with EN 55011-1B the RFI 1B filter module must be fitted together with a TR1 Series VFD with integral 1A RFI filter.

#### Technical data for TR1 2803-2875 RFI 1B filter

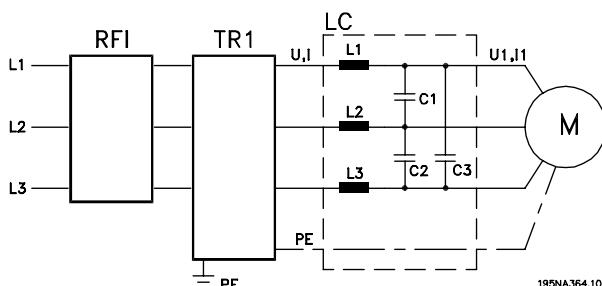

Max. cable length (screened/armoured) 200-240 V	100 m (At 1A: 100 m)
Max. cable length (screened/armoured) 380-480 V	25 m (At 1A: 50 m)
Enclosure	IP 20
Max. rated current	16 A
Max. Voltage	480 V AC
Max. voltage to earth	300 V AC
Min. distance between TR1 and RFI 1B filter	Side-by-Side
Min. distance above and below RFI 1B filter	100 mm
Dimensions H x W x D (mm) <sup>1)</sup>	200 x 60 x 87
Weight	0.9 kg

<sup>1)</sup> For mechanical dimensions see under *Mechanical dimensions*.

## RFI 1B/LC filter

The RFI 1B/LC filter contains both an RFI module that complies with EN 55011-1B and an LC filter that reduces the acoustic noise.

### LC filter

When a motor is controlled by a frequency converter, at times you will be able to hear the acoustic noise from the motor. The noise, which is caused by the design of the motor, is generated every time one of the inverter contacts in the frequency converter is activated. The frequency of the acoustic noise therefore corresponds to the frequency converters connection frequency.

The filter reduces the voltages  $dU/dt$ , the peak voltage  $U_{peak}$  and ripple current  $\Delta I$  to the motor, so that the current and voltage are almost sine-shaped. The acoustic motor noise is thus reduced to a minimum.

Because of the ripple current in the coils some noise will be emitted by the coils. This problem can be solved completely by fitting the filter inside a cabinet or equivalent.

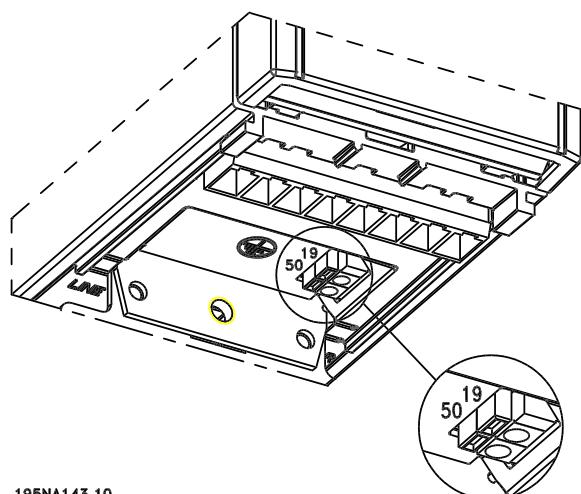

An LC filter for the frequency converter, which muffles the acoustic motor noise, can be supplied. Before the filters are put into use you must ensure that:

- rated current is observed
- mains voltage is 200-480 V
- parameter 412 *Variable switching frequency* is set to *LC filter attached* [3]
- output frequency is max. 120 Hz

See drawing on the next page.

### Installation of thermistor (PTC)

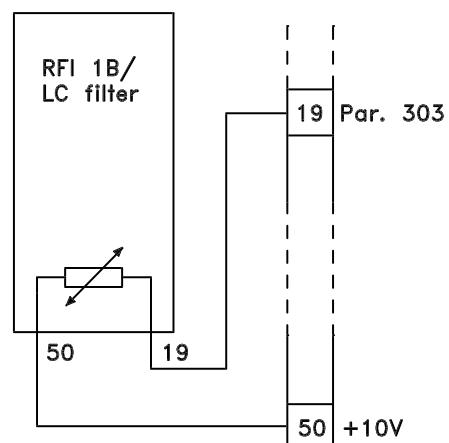

The RFI 1B/LC filter has an integral thermistor (PTC), which is activated if an overtemperature arises. The frequency converter can be programmed to stop the motor and activate an alarm via a relay output or a digital output if the thermistor is activated.

The thermistor must be connected between terminal 50 (+10V) and one of the digital inputs 18, 19, 27 and 29.

In parameter 128 *Motor thermal protection Thermistor warning* [1] or *Thermistor trip* [2] are selected.

The thermistor is connected as follows:

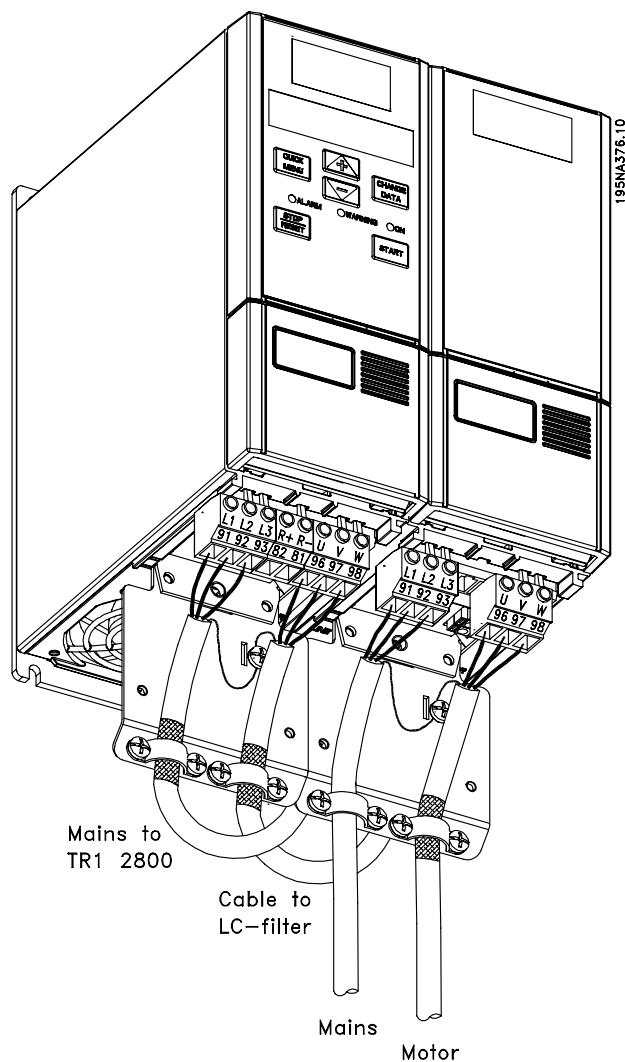

**RFI 1B/LC filter****NB!:**

To comply with EN 55011-1B the RFI 1B filter module must be fitted to a TR1 Series VFD with integral 1A RFI filter.

**NB!:**

The 1B/LC filter is not suitable for 200 V devices due to the high  $I\varnothing$  input current.

## Data sheet

---

### Technical data for TR1 2803-2840 RFI 1B/LC

#### filter

Max. cable length (screened/armoured)	380-480 V	25 m (At 1A: 50 m)
Enclosure	IP 20	
Max. rated current	4.0 (Order no.: 195N3100); 9.1 (Order no.: 195N3101)	
Max. voltage	480 V AC	
Max. voltage to earth	300 V AC	
Min. distance between TR1 and RFI 1B/LC filter	Side-by-Side	
Min. distance above and below RFI 1B/LC filter	100 mm	
Dimensions 195N3100 4.0 A H x W x D (mm)	200 x 75 x 168	
Dimensions 195N3101 9.1 A H x W x D (mm)	267.5 x 90 x 168	
Weight 195N3100 4.0 A	2.4 kg	
Weight 195N3101 9.1 A	4.0 kg	

## EMC filter for long motor cables

**NB!:**

To comply with EN55011-1A the EMC filter must be fitted to a TR1 Series VFD with integral 1A RFI filter.

**NB!:**

Set switching frequency, parameter 411, to 4500 Hz

**NB!:**

Fitting position of frequency converter:  
Vertical only.

### Technical data for TR1 2805-2875 380-480 V EMC filter for long motor cables

Max. cable length (screened/armoured)	TR1 2805-2815 380-480 V: 100 m TR1 2822-2840 380-480 V: 100 m TR1 2855-2875 380-480 V: 150 m
Enclosure	IP 20
Max. rated current	192H4719: 3.2 A, 192H4720: 9.0 A, 192H4893: 16 A
Input voltage range	3 x 380-480 V ± 10%
Mains frequency	50-60 Hz
Input	Terminals 2,5 mm <sup>2</sup> (192H4893 4 mm <sup>2</sup> )
Output	Flexible cords with sleeves
Design	Metal housing (suited for foot print and side mounting to TR1 Series VFD)
Min. distance above and below filter	100 mm
Ambient temperature	T <sub>a</sub> = 50 °C
Dimensions 192H4719 H x W x D (mm) <sup>1</sup>	244 x 75 x 45
Dimensions 192H4720 H x W x D (mm) <sup>1</sup>	313 x 90 x 50
Dimensions 192H4893 H x W x D (mm) <sup>1</sup>	313 x 140 x 50

<sup>1</sup>For drawing and more detailed dimensions, see in *Mechanical dimensions*

### Control unit

The frequency converter is always supplied with an integral control unit. All displays are in the form of a six-digit LED display capable of showing one item of operating data continuously during normal operation. As a supplement to the display, there are three indicator lamps for voltage (ON), warning (WARNING) and alarm (ALARM). Most of the frequency converters parameter Setups can be changed immediately via the integral control panel.

An LCP 2 control panel to be connected via a plug to the front of the frequency converter is available as an option. The LCP 2 control panel can be installed up to 3 metres away from the

frequency converter, e.g. on a front panel, by means of the accompanying mounting kit.

All displays of data are via a 4-line alpha-numerical display, which in normal operation is able to show 4 operating data items and 3 operation modes continuously. During programming, all the information required for quick, efficient parameter Setup of the frequency converter is displayed. As a supplement to the display, there are three indicator lamps for voltage (ON), warning (WARNING) and alarm (ALARM). Most of the frequency converters parameter Setups can be changed immediately via the LCP 2 control panel.

## Data sheet

---

ST: Standard unit.

SB: Standard unit with integral brake.

R1: With RFI filter that complies with EN 55011-1A.

R3: With RFI filter that complies with EN 55011-1B.

## Data sheet

### Brake resistors

#### Flatpack brake resistors IP 54

Type	P <sub>motor</sub> [kW]	R <sub>MIN</sub> [Ω]	Size [Ω] / [W] per item	Duty cycle %	Order no. 175Uxxxx
2803 (200 V)	0.37	297	330 Ω / 100 W	30	1003
2805 (200 V)	0.55	198	220 Ω / 100 W	20	1004
2807 (200 V)	0.75	135	150 Ω / 100 W	14	1005
2811 (200 V)	1.10	99	100 Ω / 100 W	8	1006
2815 (200 V)	1.50	69	72 Ω / 200 W	16	0092
2822 (200 V)	2.20	43	50 Ω / 200 W	9	0993
2840 (200 V)	3.70	21	50 Ω / 200 W	11	2x0993 <sup>1</sup>
2805 (400 V)	0.55	747	830 Ω / 100 W	20	1000
2807 (400 V)	0.75	558	620 Ω / 100 W	14	1001
2811 (400 V)	1.10	387	430 Ω / 100 W	8	1002
2815 (400 V)	1.50	297	310 Ω / 200 W	16	0984
2822 (400 V)	2.20	198	210 Ω / 200 W	9	0987
2830 (400 V)	3.00	135	150 Ω / 200 W	5.5	0989
2840 (400 V)	4.00	99	240 Ω / 200 W	11	2x0986 <sup>1</sup>

<sup>1</sup>These two resistors must be connected in parallel.  
See dimensions of Flatpack brake resistors on the next  
page.

## Data sheet

### Brake resistor for TR1 2803-2882 duty-cycle 40% data and codenumber

TR1 type	Intermit-tent brak-ing period time [seconds]	Pmotor [kW]	Rmin [Ω]	Rrec [Ω]	Pb, max [kW]	Therm.re-lay [Amp]	Code number	Cable cross section [mm <sup>2</sup> ]
2803 (200 V)	120	0,37	297	330	0,16	0,7	1900*	1,5**
2805 (200 V)	120	0,55	198	220	0,25	1,1	1901*	1,5**
2807 (200 V)	120	0,75	135	150	0,32	1,5	1902*	1,5**
2811 (200 V)	120	1,1	99	110	0,45	2,0	1975*	1,5**
2815 (200 V)	120	1,5	74	82	0,85	3,2	1903*	1,5**

2882 (400 V)	120	18,5	25	25	13,0	22,8	1999	4**

\*With KLIXON switch

\*\*Always observe national and local regulations

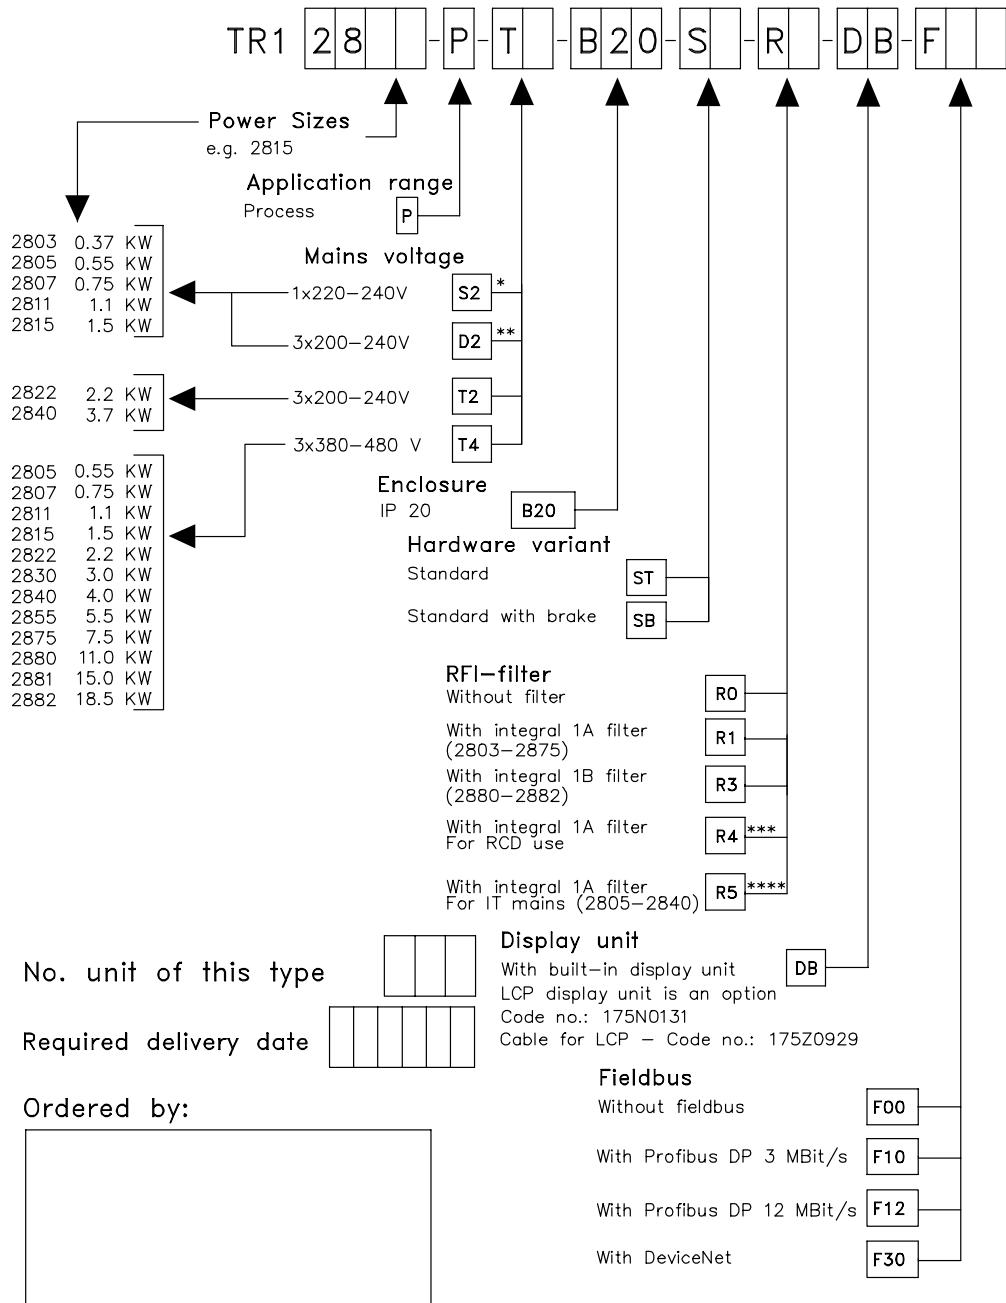

## Data sheet

---

$P_{motor}$	: Rated motor size for TR1 type
$R_{min}$	: Minimum permissible brake resistor
$R_{rec}$	: Recommended brake resistor
$P_b, \text{max}$	: Brake resistor rated power as stated by supplier
Therm. relay	: Brake current setting of thermal relay
Code number	: Order numbers for brake resistors
Cable cross section	: Recommended <u>minimum</u> value based upon PVC insulated copper cable, 30 degree Celsius ambient temperature with normal heat dissipation

See dimensions of brake resistor for TR1 2803-2882 dutycycle 40% in instruction MI.90.FX.YY.

Please take a copy of the ordering form.

Fill it in and send or fax your order  
to the nearest Danfoss rep. office.

- Without fieldbus F00
- With Profibus DP 3 MBit/s F10
- With Profibus DP 12 MBit/s F12
- With DeviceNet F30

\* S2 = Unit can only be ordered with RFI filter

\*\*D2 = Unit cannot be ordered with RFI filter

\*\*\* = Unit can only be ordered with S2

\*\*\*\* = Unit can only be ordered with T4

**PC Software tools****PC Software - MCT 10**

All drives are equipped with a serial communication port. We provide a PC tool for communication between PC and frequency converter, TR1 Motion Control Tool MCT 10 Set-up Software.

**MCT 10 Set-up Software**

MCT 10 has been designed as an easy to use interactive tool for setting parameters in our frequency converters.

The MCT 10 Set-up Software will be useful for:

- Planning a communication network off-line. MCT 10 contains a complete frequency converter database
- Commissioning frequency converters on line
- Saving settings for all frequency converters
- Replacing a drive in a network
- Expanding an existing network
- Future developed drives will be supported

MCT 10 Set-up Software support Profibus DP-V1 via a Master class 2 connection. It makes it possible to on line read/write parameters in a frequency converter via the Profibus network. This will eliminate the need for an extra communication network.

**The MCT 10 Set-up Software Modules**

The following modules are included in the software package:

- MCT 10 Set-up Software**
- Setting parameters
  - Copy to and from frequency converters
  - Documentation and print out of parameter settings incl. diagrams

**SyncPos**

Creating SyncPos programme

**Ordering number:**

Please order your CD containing MCT 10 Set-up Software using code number 130B1000.

**TRANE®**

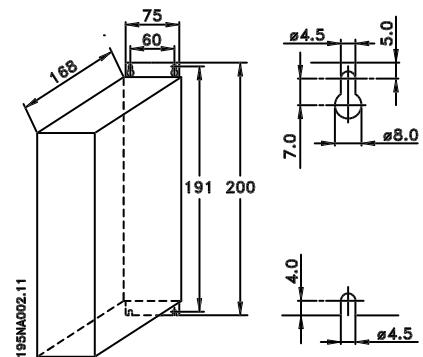

## Data sheet

### Mechanical dimensions

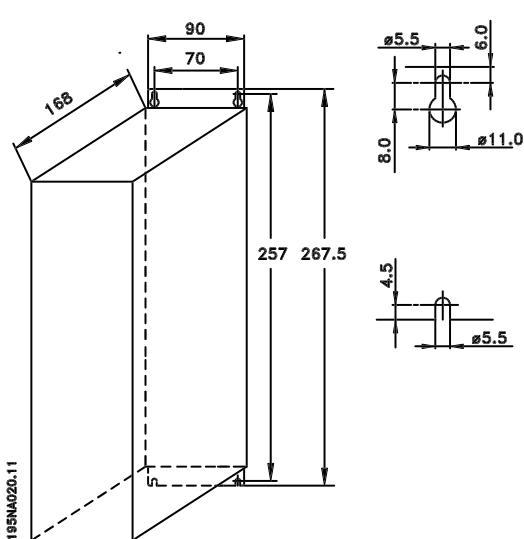

The drawings below give the mechanical dimensions. All dimensions are in mm.

**TR1 2803-2815 200-240 Volt**

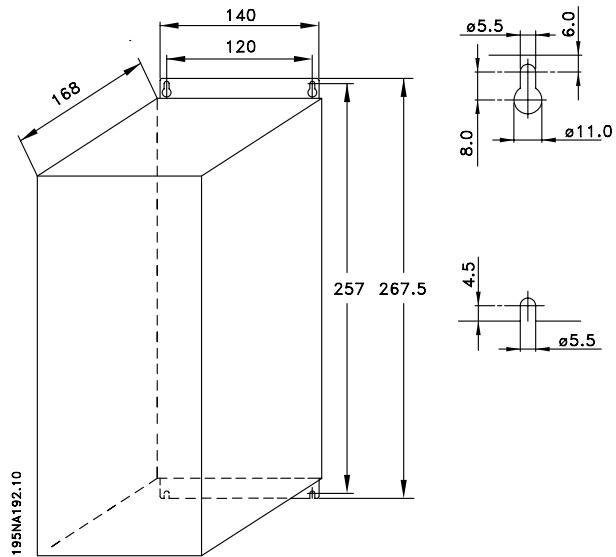

**TR1 2805-2815 380-480 Volt**

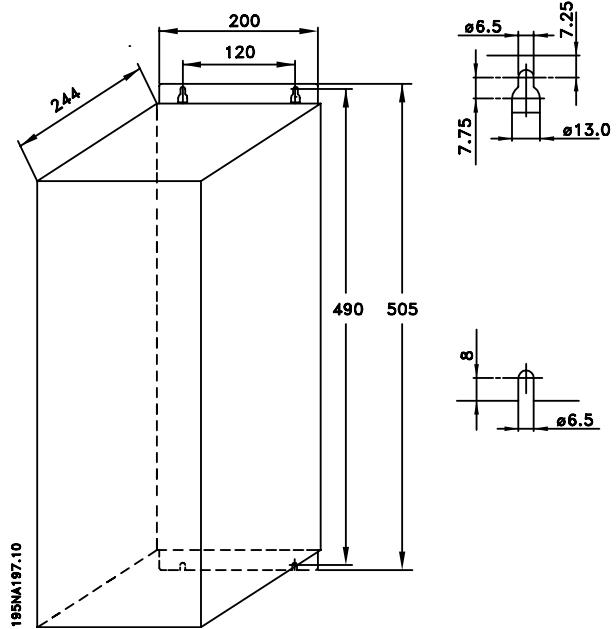

**TR1 2822 200-240 Volt**  
**TR1 2822-2840 380-480 Volt**

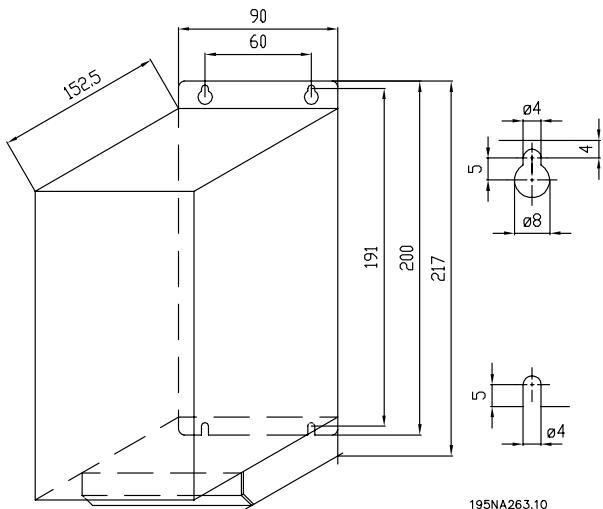

**TR1 2840 200-240 Volt**  
**TR1 2855-2875 380-480 Volt**

**TR1 2880-82 380-480V**

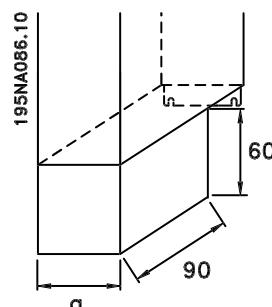

**Motor coils (195N3110)**

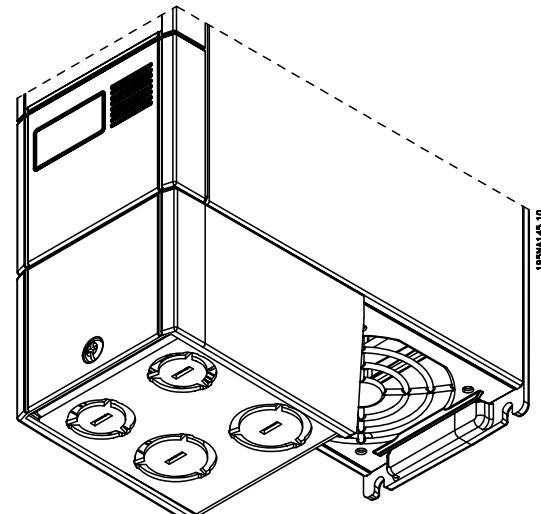

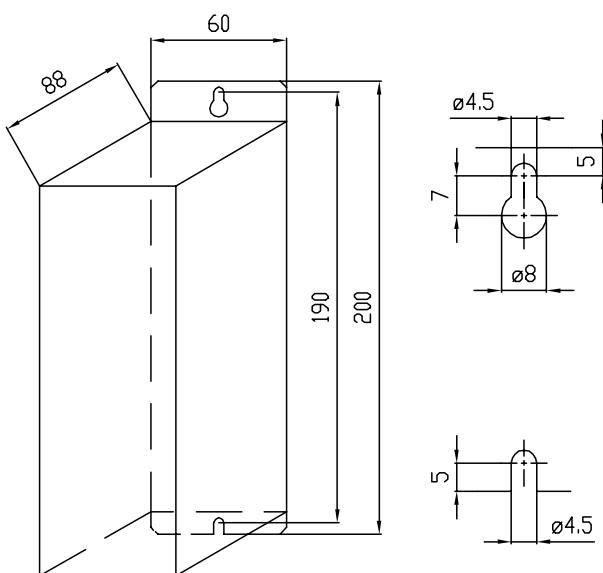

**Terminal cover**

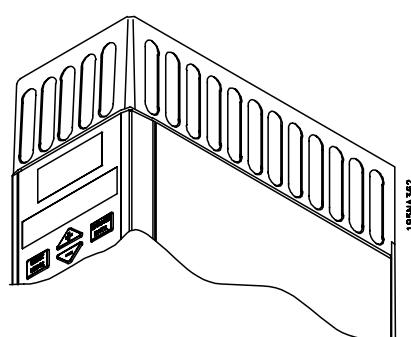

The drawing below gives the dimensions for NEMA 1 terminal covers for TR1 2803-2875. Dimension a depends on the unit type.

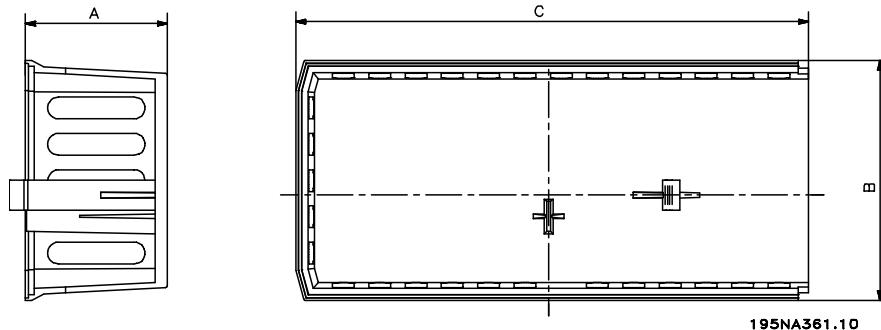

**RFI 1B filter (195N3103)**

**IP 21 solution**

### Electrical installation

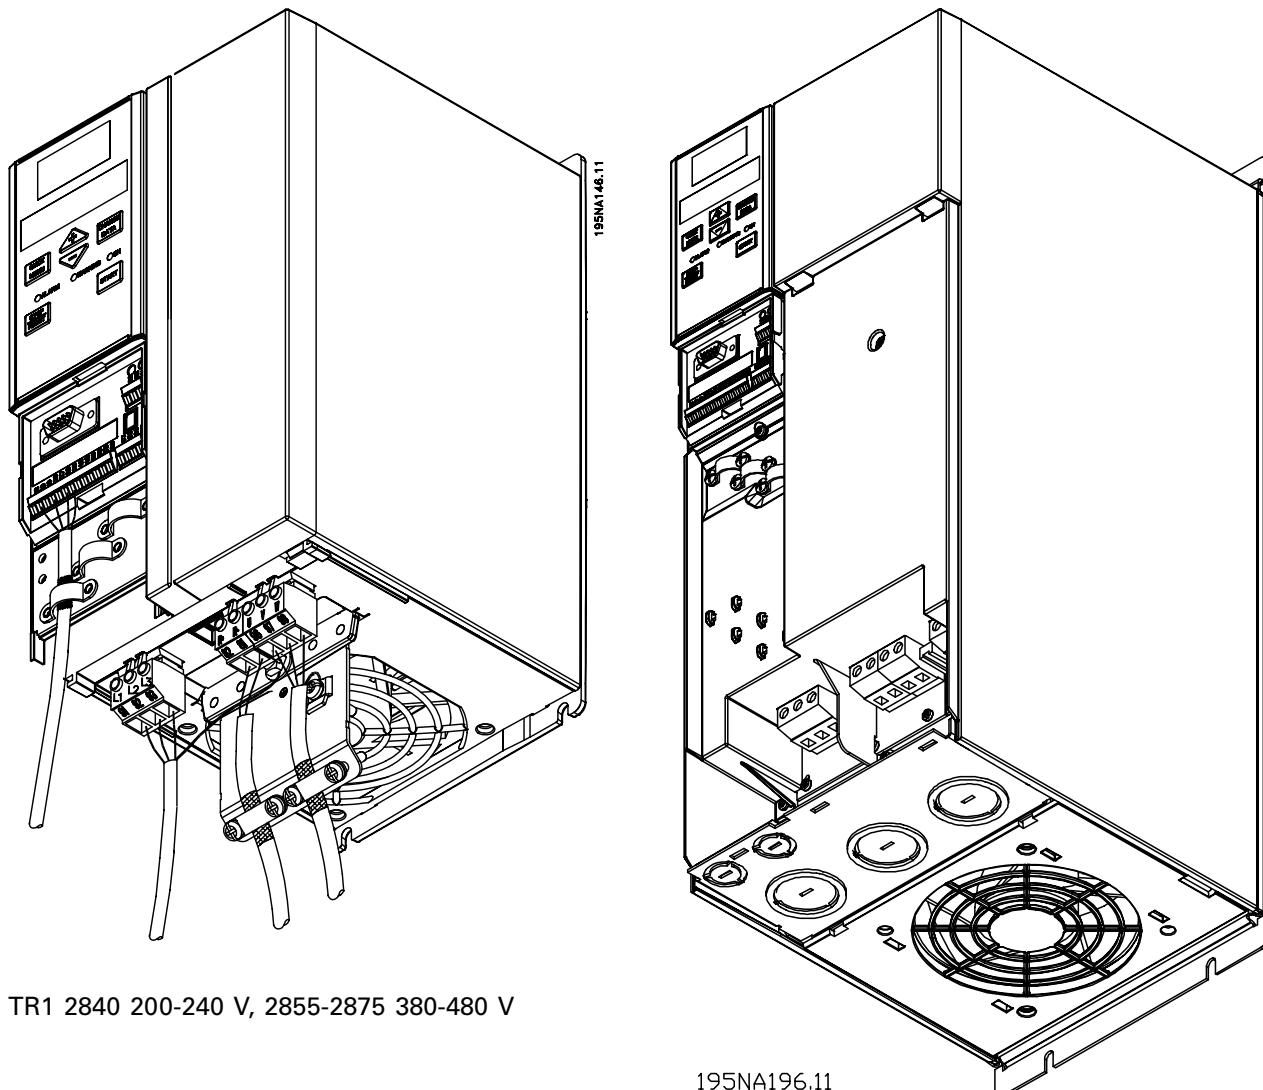

TR1 2803-2815 200-240 V, 2805-2815 380-480 V

TR1 2822 200-240 V, 2822-2840 380-480 V

## Data sheet

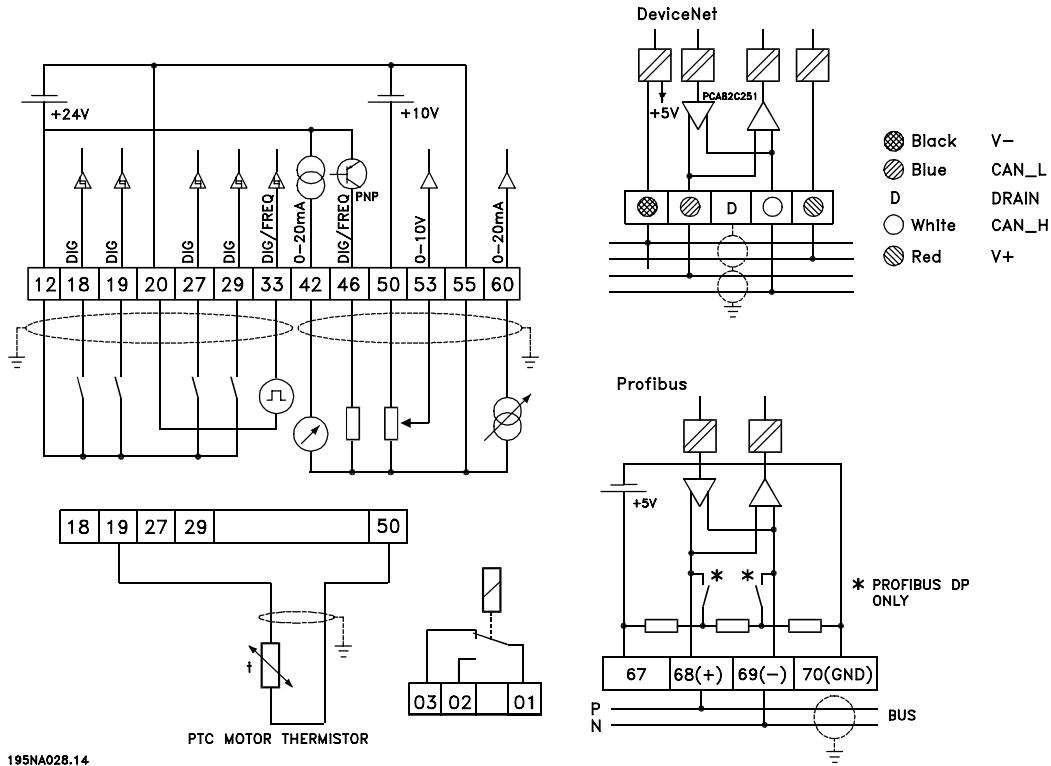

TR1 2840 200-240 V, 2855-2875 380-480 V

195NA196.11

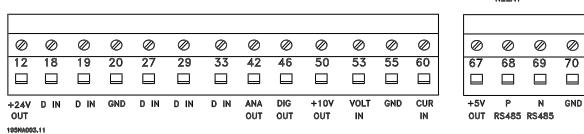

TR1 2880-2882 380-480V

Please note, that the units will be supplied with two bottom plates; one for metric glands and one for conduits.

195NA028.14

## Electrical installation, control terminals

No.	Function
01-03	Relay outputs 01-03 can be used for indicating status and alarms/warnings.
12	24 V DC voltage supply.
18-33	Digital inputs.
20, 55	Common frame for input and output terminals.
42	Analog output for displaying frequency, reference, current or torque.
46 <sup>1</sup>	Digital output for displaying status, warnings or alarms, as well as frequency output.
50	+10 V DC supply voltage for potentiometer or thermistor.
53	Analogue voltage input 0 - 10 V DC.
60	Analogue current input 0/4 - 20 mA.
67 <sup>1</sup>	+ 5 V DC supply voltage to Profibus.
68, 69 <sup>1</sup>	RS 485, Serial communication.
70 <sup>1</sup>	Frame for terminals 67, 68 and 69. Normally this terminal is not to be used.

## Data sheet

---

1. The terminals are not valid for DeviceNet.

See the DeviceNet manual, MG.90.BX.YY  
for further details.

---

## Data sheet

### General technical data

#### Mains supply (L1, L2, L3):

Supply voltage TR1 2803-2815 220-240 V (N, L1)	.....	1 x 220/230/240 V ±10%
Supply voltage TR1 2803-2840 200-240 V	.....	3 x 200/208/220/230/240 V ±10%
Supply voltage TR1 2805-2882 380-480 V	.....	3 x 380/400/415/440/480 V ±10%
Supply frequency	.....	50/60 Hz ± 3 Hz
Max. imbalance on supply voltage	.....	± 2.0% of rated supply voltage
True Power Factor ( $\lambda$ )	.....	0.90 nominal at rated load
Displacement Power Factor ( $\cos \phi$ )	.....	near unity (> 0.98)
Number of connections at supply input L1, L2, L3	.....	2 times/min.
Max. short-circuit value	.....	100,000 A

#### Output data (U, V, W):

Output voltage	.....	0 - 100% of supply voltage
Output frequency	.....	0.2 - 132 Hz, 1 - 1000 Hz
Rated motor voltage, 200-240 V units	.....	200/208/220/230/240 V
Rated motor voltage, 380-480 V units	.....	380/400/415/440/460/480 V
Rated motor frequency	.....	50/60 Hz
Switching on output	.....	Unlimited
Ramp times	.....	0.02 - 3600 sec.

#### Torque characteristics:

Starting torque (parameter 101 Torque characteristic = Constant torque)	.....	160% in 1 min.*
Starting torque (parameter 101 Torque characteristics = Variable torque)	.....	160% in 1 min.*
Starting torque (parameter 119 <i>High starting torque</i> )	.....	180% for 0.5 sec.*
Overload torque (parameter 101 Torque characteristic = Constant torque)	.....	160%*
Overload torque (parameter 101 Torque characteristic = Variable torque)	.....	160%*

\*Percentage relates to frequency converters nominal current.

#### Control card, digital inputs:

Number of programmable digital inputs	.....	5
Terminal number	.....	18, 19, 27, 29, 33
Voltage level	.....	0 - 24 V DC (PNP positive logic)
Voltage level, logic 0	.....	< 5 V DC
Voltage level, logic 1	.....	> 10 V DC
Maximum voltage on input	.....	28 V DC
Input resistance, $R_i$ (terminals 18, 19, 27, 29)	.....	approx. 4 k $\Omega$
Input resistance, $R_i$ (terminal 33)	.....	approx. 2 k $\Omega$

All digital inputs are galvanically isolated from the supply voltage (PELV) and other high-voltage terminals. See section entitled Galvanic Isolation.

## Data sheet

### Control card, analog inputs:

Number of analog voltage inputs .....	1 pcs.
Terminal number .....	53
Voltage level .....	0 - 10 V DC (scaleable)
Input resistance, $R_i$ .....	approx. 10 kΩ
Max. voltage .....	20 V
Number of analog current inputs .....	1 pcs.
Terminal number .....	60
Current level .....	0/4 - 20 mA (scaleable)
Input resistance, $R_i$ .....	approx. 300 Ω
Max. current .....	30 mA
Resolution for analog inputs .....	10 bit
Accuracy of analog inputs .....	Max. error 1% of full scale
Scan interval .....	13.3 msec

*The analog inputs are galvanically isolated from the supply voltage (PELV) and other high-voltage terminals. See section entitled Galvanic Isolation.*

### Control card, pulse inputs:

Number of programmable pulse inputs .....	1
Terminal number .....	33
Max. frequency at terminal 33 .....	67.6 kHz (Push-pull)
Max. frequency at terminal 33 .....	5 kHz (open collector)
Min. frequency at terminal 33 .....	4 Hz
Voltage level .....	0 - 24 V DC (PNP positive logic)
Voltage level, logic 0 .....	< 5 V DC
Voltage level, logic 1 .....	> 10 V DC
Maximum voltage on input .....	28 V DC
Input resistance, $R_i$ .....	approx. 2 kΩ
Scan interval .....	13.3 msec
Resolution .....	10 bit
Accuracy (100 Hz- 1 kHz) terminal 33 .....	Max. error: 0.5% of full scale
Accuracy (1 kHz - 67.6 kHz) terminal 33 .....	Max. error: 0.1% of full scale

*The pulse input (terminal 33) is galvanically isolated from the supply voltage (PELV) and other high-voltage terminals. See section entitled Galvanic Isolation.*

### Control card, digital/frequency output:

Number of programmable digital/pulse outputs .....	1 pcs.
Terminal number .....	46
Voltage level at digital/frequency output .....	0 - 24 V DC (O.C PNP)
Max. output current at digital/frequency output .....	25 mA.
Max. load at digital/frequency output .....	1 kΩ
Max. capacity at frequency output .....	10 nF
Minimum output frequency at frequency output .....	16 Hz
Maximum output frequency at frequency output .....	10 kHz
Accuracy on frequency output .....	Max. error: 0.2 % of full scale
Resolution on frequency output .....	10 bit

## Data sheet

---

*The digital output is galvanically isolated from the supply voltage (PELV) and other high-voltage terminals. See section entitled Galvanic Isolation.*

## Data sheet

### Control card, analog output:

Number of programmable analog outputs .....	1
Terminal number .....	42
Current range at analog output .....	0/4 - 20 mA
Max. load to common at analog output .....	500 Ω
Accuracy on analog output .....	Max. error: 1.5 % of full scale
Resolution on analog output .....	10 bit

*The analog output is galvanically isolated from the supply voltage (PELV) and other high-voltage terminals. See section entitled Galvanic Isolation.*

### Control card, 24 V DC output:

Terminal number .....	12
Max. load .....	130 mA

*The 24 V DC supply is galvanically isolated from the supply voltage (PELV), but has the same potential as the analogue and digital inputs and outputs. See section entitled Galvanic Isolation.*

### Control card, 10 V DC output:

Terminal number .....	50
Output voltage .....	10.5 V ±0.5 V
Max. load .....	15 mA

*The 10 V DC supply is galvanically isolated from the supply voltage (PELV) and other high-voltage terminals. See section entitled Galvanic Isolation.*

### Control card, RS 485 serial communication:

Terminal number .....	68 (TX+, RX+), 69 (TX-, RX-)
Terminal number 67 .....	+ 5 V
Terminal number 70 .....	Common for terminals 67, 68 and 69
<i>Full galvanic isolation. See section entitled Galvanic Isolation.</i>	

### Relay outputs:

Number of programmable relay outputs .....	1
Terminal number, control card .....	1-3 (break), 1-2 (make)
Max. terminal load (AC) on 1-3, 1-2, control card .....	240 V AC, 2 A
Min. terminal load on 1-3, 1-2, control card .....	24 V DC 10 mA, 24 V AC 100 mA
<i>The relay contact is separated from the rest of the circuit by strengthened isolation. See section entitled Galvanic Isolation.</i>	

### Cable lengths and cross sections:

Max. motor cable length, screened/armoured cable .....	40 m
Max. motor cable length, unscreened/unarmoured cable .....	75 m
Max. motor cable length, screened/armoured cable and motor coil .....	100 m
Max. motor cable length, unscreened/unarmoured cable and motor coil .....	200 m
Max. motor cable length, screened/armoured cable and RFI/1B filter .....	200 V, 100 m
Max. motor cable length, screened/armoured cable and RFI/1B filter .....	400 V, 25 m
Max. motor cable length, screened/armoured cable and RFI 1B/LC filter .....	400 V, 25 m
<i>Max. cross section to motor, see next section.</i>	

## Data sheet

---

Max. cross section to control wires, rigid wire ..... 1.5 mm<sup>2</sup>/16 AWG (2 x 0.75 mm<sup>2</sup>)

Max. cross section to control cables, flexible cable ..... 1 mm<sup>2</sup>/18 AWG

Max. cross section to control cables, cable with enclosed core ..... 0.5 mm<sup>2</sup>/20 AWG

***When complying with EN 55011 1A and EN 55011 1B the motor cable must in certain instances be reduced. See EMC emission.***

## Data sheet

### Control characteristics:

Frequency range .....	0.2 - 132 Hz, 1 - 1000 Hz
Resolution of output frequency .....	0.013 Hz, 0.2 - 1000 Hz
Repeat accuracy of <i>Precise start/stop</i> (terminals 18, 19) .....	$\leq \pm 0.5$ msec
System response time (terminals 18, 19, 27, 29, 33) .....	$\leq 26.6$ msec
Speed control range (open loop) .....	1:15 of synchronous speed
Speed control range (closed loop) .....	1:120 of synchronous speed
Speed accuracy (open loop) .....	90 - 3600 rpm: Max. error of $\pm 23$ rpm
Speed accuracy (closed loop) .....	30 - 3600 rpm: Max. error of $\pm 7.5$ rpm

*All control characteristics are based on a 4-pole asynchronous motor*

### Surroundings:

Enclosure .....	IP 20
Enclosure with options .....	NEMA 1
Vibration test .....	0.7 g
Max. relative humidity .....	5% - 93% during operation
Ambient temperature .....	Max. 45 °C (24-hour average max. 40 °C)
Min. ambient temperature during full-scale operation .....	0 °C
Min. ambient temperature at reduced performance .....	- 10 °C
Temperature during storage/transport .....	- 25 - +65/70 °C
Max. altitude above sea level .....	1000 m
EMC standards, Emission .....	EN 50081-2, EN 61800-3, EN 55011
EMC standards, Immunity .....	EN 50082-1/2, EN 61000-4-2, EN 61000-4-3, EN 61000-4-4, EN 61000-4-5, EN 61000-4-6, EN 61800-3

### Safeguards:

Electronic thermal motor protection against overload.

Temperature monitoring of the power module ensures that the frequency converter cuts out if the temperature reaches 100 °C. An overload temperature cannot be reset until the temperature of the power module is below 70 °C.

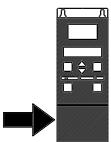

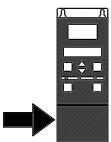

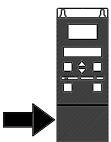

The frequency converter is protected against short-circuits on motor terminals U, V, W.

If a mains phase is missing, the frequency converter will cut out.

Monitoring of the intermediate circuit voltage ensures that the frequency converter cuts out if the intermediate circuit voltage is too low or too high.

The frequency converter is protected against earth fault on motor terminals U, V, W.

## Technical data, mains supply 1 x 220 - 240 V/3 x 200-240V

According to . international standards	Type	2803	2805	2807	2811	2815	2822	2840
 → Output current (3 x 200-240V)	I <sub>INV.</sub> [A] I <sub>MAX</sub> (60s) [A]	2.2 3.5	3.2 5.1	4.2 6.7	6.0 9.6	6.8 10.8	9.6 15.3	16 25.6

Weight	[kg]	2.0	2.0	2.0	2.0	2.0	3,7	6.0
Enclosure <sup>4)</sup>	type	IP 20	IP 20	IP 20	IP 20	IP 20	IP 20	IP 20

1. American Wire Gauge. Max. cable cross section is the largest cable cross section that can be attached to the terminals. Always observe national and local regulations.
2. Type gG pre-fuses must be used for installation according to IEC rules. If you want to maintain UL/cUL you must use pre-fuses of the type Bussmann KTN-R 200 V, KTS-R 500 V or Ferraz Shawmut, type ATMR (max. 30A). The fuses must be placed for protection in a circuit that is capable of supplying a maximum of 100,000 amps RMS (symmetrical), 500 V maximum.
3. Measured using a 25 m screened/armoured motor cable with a rated load and rated frequency.
4. IP20 is standard for TR1 2805-2875, whereas NEMA 1 is an option.

## Data sheet

### Technical data, mains supply 3 x 380 - 480 V

According to international standards	Type	2805	2807	2811	2815	2822	2830
