FOR IMMEDIATE RELEASE

Ingersoll Rand Leader Shares Green Building Principles, Practices and Policies at Globe 2010

- *Dane Taival to present recommendations for project funding and incentives for organizations* -

Vancouver, B.C., March 18, 2010 – Buildings are significant consumers of energy and major contributors to global greenhouse gas emissions. Organizations are discovering the importance of employing green building practices and principles not only to raise the level of its building's operational performance but also to make it more environmentally friendly.

Dane Taival, vice president of global contracting solutions for Hussmann and Trane businesses of Ingersoll Rand, will be speaking at the Globe 2010 conference as part of panel discussion *Eco Communities: Designing a Sustainable Future*. The panel will explore how cities and communities are becoming more sustainable through better planning, integrated developments and the design of resource-efficient buildings.

During the session, Taival will present recommendations for implementing energy and operational efficiency practices within organizations. His discussion will focus on project funding and incentives in Canada, the United States and rest of the world.

The panel will be moderated by Gwendolyn Hallsmith, founder of Global Community Initiative, and will feature commentary from industry leading experts from around the globe.

Details of his presentation are:

When: Wednesday, March 24 at 1:30 p.m. (Conference is March 24-26)

Where: Meeting Room Level, Vancouver Convention & Exhibition Centre – East Building

Conference Web site: <http://www.globe2010.com>

Globe 2010 is one of the world's largest and longest-running events dedicated to the business of the environment. Every two years, more than 10,000 professionals from 70+ countries come together at Globe to attend thought-leading sessions presented by world-renowned sustainability experts, to survey leading-edge environmental innovations and to participate in unparalleled global networking opportunities.
