FOR IMMEDIATE RELEASE

Ingersoll Rand's Asia Pacific President Makes Business Case That Bottom Line Success Can Be Achieved By Promoting Energy Efficiency

Singapore – September 1, 2010 – Rising energy costs and increased public awareness of going green and energy efficiency means businesses are looking for ways to reduce energy consumption in order to achieve costs savings.

Presenting company leadership with a financially motivated business case to promote energy efficiency is the ticket to explore new business solutions which can offer operational improvements in both new and existing buildings, ultimately helping companies significantly reduce their energy use and realize substantial cost savings.

Francis Yuen, president - Asia Pacific, Ingersoll Rand Climate Solutions, will give the CEO address and participate in a plenary session at HVAC Asia on Wednesday, September 1, 2010.

During his presentation, “Driving Energy Efficiency for Buildings – A CEO’s Approach to Growth,” Yuen will share innovative and realistic methods for businesses to reduce operating costs by creating high performance and energy efficient buildings. His presentation includes:

- An overview of today’s operating realities and energy environment
- The financial case for furthering HVAC energy efficiency and energy efficient buildings
- Industry leading energy efficient practices that businesses can adopt
- Business examples from companies that show businesses can reduce operating costs by creating high performing and energy efficient buildings

In addition, Yuen will participate in the plenary session entitled: “Efficient Energy Management – Creating a Diverse, Holistic and Efficient Growth Platform.”

Details of his keynote presentation are:

When: Wednesday, September 1 at 10:30 a.m. (The conference runs September 1-3)

Details of Plenary Session

When: Wednesday, September 1 at 5:00 p.m.

Where: Marina Bay Sands, Singapore

Conference website: <http://hvacrseries.com/asia/2010/>

HVAC Asia 2010 aims to address the rapid industrial growth in South East Asia which is fueling a strong and growing demand for sophisticated, cost-efficient and environmentally-friendly systems. This two-day industry conference helps experts share their knowledge on the latest cutting-edge technologies and systems while providing real-life case studies which delegates can apply in their individual companies and regions to stay ahead in the industry.
