

FOR IMMEDIATE RELEASE

Energy Tools and Technologies Can Help Indiana Businesses Create High Performance Buildings

Indianapolis, Indiana, April 13, 2009 – According to the Midwest Energy Efficiency Alliance, executing energy efficiency programs could save Indiana families and businesses more than \$1.3 billion in natural gas and electricity costs over the next five years.

With that savings in mind, Dave Sommer, business leader for the Trane commercial systems business in Indiana, and Richard Campbell, vice president of the Central territory in the U.S. for Trane, will explain the financial and environmental pay-offs of energy efficient buildings at the **2009 Indiana Building & Facility Maintenance Show**.

Details of the presentation are:

When: April 16, 2009 at 12:30 p.m. (Conference is April 15-16)
Where: Indiana Convention Center, Indianapolis, IN
Conference Website: <http://www.ib-fm.com/>

Sommer and Campbell will educate attendees on emerging tools and technologies to drive businesses toward greater efficiency, and how to measure success. These technologies include design stage tools and those specific to construction; building performance; and operation and renovation.

They will demonstrate how and why there is no need to wait to make existing buildings more energy efficient – there are many proven systems and services available today to do the job including: high efficiency chilled water systems, district cooling / heating system, thermal storage systems, geothermal and energy recovery. At the same time, they will discuss emerging technologies including solar / photovoltaic systems, co-generation, wind power, and water conservation.

The Indiana Building & Facility Maintenance Show brings together building and facility managers and maintenance technicians for seminars and demonstrations of the latest products, technologies and services today's maintenance and repair operation professionals need.

Richard Campbell is vice president of the Central territory in the U.S. for Trane. In his role, Richard is responsible for the sales and operations of Trane's systems, services and solutions business to building owners, contractors and consulting engineers.

Dave Sommer is the business leader for the Trane commercial systems business in Indiana, responsible for providing building owners and their influencers with energy efficient heating, ventilating and air conditioning (HVAC) systems and services. He has delivered economically and environmentally responsible solutions to commercial buildings throughout the state.

###

About Trane

Trane, a business of Ingersoll Rand - the world leader in creating and sustaining safe, comfortable and energy efficient environments - improves the performance of homes and buildings around the world. Trane solutions optimize indoor environments with a broad portfolio of energy efficient heating, ventilating and air conditioning systems, building and contracting services, parts support and advanced controls for homes and commercial buildings.
