Trane Opens Rental Equipment Stocking Location in Baton Rouge

- New center offers fast and reliable service to building owners and contractors -

Baton Rouge, La., Sept. 22, 2009 - The new Trane Rental Services stocking location in Baton Rouge, La., provides portable power and heating, ventilating and air conditioning (HVAC) temperature control rentals to meet the temporary power, heating and cooling needs of building owners and contractors in the Gulf Region, which includes Louisiana, Alabama, Mississippi, Arkansas and Texas.

Trane Rental Services has been providing temporary power, cooling and heating solutions for a variety of applications, including disaster recovery, emergency and planned situations for more than 16 years. Whether business needs are for small portable coolers, portable power and electrical distribution, or up to thousands of tons of chilled water, Trane offers a modern fleet of diesel generators, air- and water-cooled chillers, small portable cooling units, rooftop HVAC units, cooling towers, air handling units and accessories that are prepped and ready to ship at a moment's notice.

"Gulf South Trane has helped hundreds of customers with their temporary applications," said Ed French, business leader for Trane in Gulf South. "Having equipment available immediately allows us to respond to our customers' emergency needs even faster, which reduces their business interruption."

Trane Rental Services has 29 stocking locations throughout the U.S., Canada and Mexico. Visit www.trane.com/rentalservices for a list of Trane Rental Services offerings including: rooftop HVAC units, air- and water-cooled chiller systems, cooling towers, power generators, and accessories needed for proper installation.
