Trane Rental Services Opens New Location in Salt Lake City to Increase Customer Service on the West Coast

Piscataway, NJ, Feb. 4 – Trane, a global provider of indoor comfort systems and comprehensive facility solutions, is expanding its rental services business by adding a new maintenance and stocking location in Salt Lake City. The new facility will be available for service on March 13.

This new facility in Utah allows building owners and contractors who face HVAC emergencies in the western and central parts of the U.S. to save time and money on product shipment.

Trane Rental Services provides short- and long-term temporary cooling or heating solutions for emergency and planned situations. Trane's modern fleet of HVAC systems are prepped and ready to ship at a moment's notice to manufacturing facilities, hospitals, universities, ice rinks, on-location television shows, tournaments, and special engagements.

"Trane's rental services business is about supporting our customers when they need us most – whether it's during an emergency or renovation," said Larry Wash, Trane's service leader in the Americas. "This additional facility will allow us to improve relationships and reliability with our new and existing customers."

Trane Rental Services has 25 stocking locations throughout the U.S., Canada and Mexico. Visit www.trane.com/rentalservices for a list of offerings Trane Rental Services supplies.

###

Trane Inc. (NYSE: TT), previously named American Standard Companies Inc., provides systems and services that enhance the quality and comfort of the air in homes and buildings around the world. The company offers customers a broad range of energy-efficient heating, ventilation and air conditioning (HVAC) systems; dehumidifying and air cleaning products; service and parts support; advanced building controls and financing solutions. Selling under both the Trane® and American Standard® brand names, the company's systems and services have leading positions in premium commercial, residential, institutional and industrial markets; a reputation for reliability, high quality and product innovation; and a powerful distribution network. In 2006 the business generated annual revenues of approximately \$6.8 billion with \$4.9 billion coming from equipment systems and \$1.9 billion from services. Trane has more than 29,000 employees and 29 production facilities worldwide. For more information, visit these Web sites: <http://www.trane.com/> and <http://www.americanstandardair.com/>.
