

Be our guest ... and attend this program from Trane

Air-Handling Systems, Energy and IAQ

when

**Wednesday
November 4, 2009**

11:00 PM – 12:30 PM

Please arrive by 10:45 AM

Lunch will be served

where

**Madison Trane
4801 Voges Road
Madison, WI 53718
608.838.8200**

directions

From Beltline Hwy. 12/18, exit Stoughton Road (Hwy. 51) South. Proceed ¼-mile. At first stoplight, turn left on Voges Rd. Our building is on the right. Parking is limited.

Air-handling systems are key elements for building comfort and air quality, but they use energy. How much energy? Fans can consume as much as half of the entire building's energy. Of course, the real answer depends on system configuration and control strategies. What's the latest? What are your choices? How can you optimize? Come and learn—Don't miss it!

Who should attend?

- Design engineers and HVAC system optimization professionals

Why should you attend this event?

- Building owners are increasingly focused on reducing energy use, which creates opportunities for energy-saving HVAC strategies.
- Learn how to maximize LEED points through airside optimization.
- There are many types of air cleaning technologies, and deciding which to use when is often a challenging task.

What can you expect to learn from this presentation?

- Highlights of the latest initiatives to reduce building energy
- Air-handling system configurations and control strategies that reduce energy use
- Benefits and drawbacks of various air-cleaning approaches that are used to improve IAQ

How do you register for this FREE event?

- **Registration Deadline:** Monday, November 2, 2009

To register: Email Kelly Willert: kelly.willert@trane.com or Fax this form to 910-725-1222 (office in NC)

Yes! I plan to attend!
