

FIND SUSTAINABILITY AT TRANE

At Trane, our favorite color is orange.

And another lovely shade some would call lime, emerald, olive, or a vivid verdant hue more commonly known in quotidian vernacular as "green."

To architects and engineers, green is not just a color, but a way of thinking.

Sustainability, renewable resources, and energy efficiency are on our minds, too. Talk to Trane today. We're not just bringing you a legacy of commitment and trust with our HVAC products and services. We're imagining the future, too – a healthier, more sustainable one – with our range of energy management solutions.

FIND ENERGY SOLUTIONS AT TRANE

At Trane, we love to talk about HVAC.

And other engaging topics that are on all our minds lately, like energy efficiency and energy solutions.

For architects and engineers, energy solutions are not just something to discuss at the 9 a.m. staff meeting. Energy solutions are key to our environmental and financial longevity. Which of the following topics are you actively discussing with your clients?

Energy Audits | Retrocommissioning | Thermal Energy Storage | System Optimization | Solar (Thermal and Photovoltaic) | Overall Baseline Utility Consumption | Energy Usage – Consolidation/Conservation | Coordination of Energy Load/Peak Pricing | Rate Analysis with Utility Meters | Lighting Upgrades | Cogeneration
