Trane Expands Temporary Solutions with Long-Term Rental Including Rent-to-Buy Option

Brussels, Belgium, 15 May, 2013 – Cooling is critical for most businesses, whether it is to create the right indoor environment for buildings or to provide reliable cooling for industrial processes. Building owners and operators can now fulfill their cooling needs with the new long-term rental offering from [Trane](#) that matches their budget.

Trane, a leading global provider of indoor comfort solutions and services and a brand of [Ingersoll Rand](#), now offers long-term rental tailored to meet the cooling requirements of customers in Europe, the Middle East and India. Long-term rental offers a cost-effective solution for customers who, due to various economic and budgeting reasons, limit their capital spend to purchase or replace heating, ventilation and air conditioning (HVAC) systems.

Within the new long-term rental offering from Trane, customers can choose between two options tailored to their needs:

1. Chillers can be rented for extended time periods to suit specific customer requirements.
2. The Rent-to-Buy option allows customers to rent chillers for longer periods and buy them at the end of the rental period.

Trane Rental Services can be applied in a wide variety of facilities, including healthcare, data centers, industrial, hospitality and commercial buildings. Depending on customers' unique requirements, Trane offers personalized solutions in addition to the existing range of rental units.

“Whether its overall economic conditions, budget constraints or unbudgeted equipment replacement, long-term rental can be the best answer for many building owners and operators today,” said Sai Srikanth, HVAC controls, turnkey solutions and service portfolio leader for Trane in Europe, the Middle East, India and Africa. “Trane offers them a long-term rental solution that meets both their cooling and financial needs.”

Trane rental solutions have been specifically re-engineered for rental applications and the units are selected for fast installation and easy operation. Throughout the duration of the rental period, regular maintenance is provided by experienced Trane engineers.

Available in 11 languages, the online rental portal provides customers with information on chiller rental range and local Trane Rental Services contacts. Customers can submit their requests through the online contact form at www.trane-chiller-rental.eu.
