

XB300 AIR CONDITIONER

WELCOME TO COOL, RELIABLE COMFORT.

It's Hard To Stop A Trane.®

XB300 AIR CONDITIONER

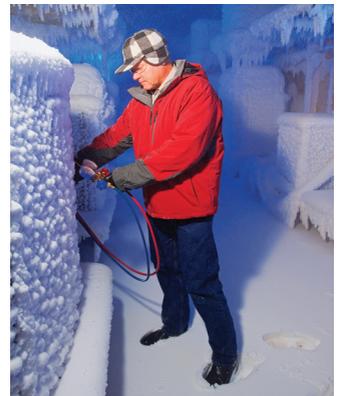

Trane has produced many reliable, innovative products over the years, each constructed with our incredible attention to detail, using decades of engineering experience and the finest materials available. Now, we're taking that innovation in an entirely new direction. The new Trane XB300 has all the expected reliability, power and performance of Trane, in an entirely new compact design.

A Trane, through and through.

As the most reliable air conditioning brand in North America, we have a reputation to uphold. Everything we produce must live up to it, and the XB300 is no exception.

It undergoes the same torturous testing to which we subject other Trane products, including years of temperature and mechanical stress compressed into just a few weeks in Trane's Systems Environmental Extreme Testing (SEET) Lab.

And while industry standards dictate testing a coil to only 250,000 stress cycles, the Climatuff™ coil in the XB300 was tested to over 3 million cycles to assure years of trouble-free service.

INSIDE THE XB300

- 1 Trane's legendary Climatuff® compressor is so durable it's practically a legend. It's the same compressor you'll find at the heart of nearly every Trane air conditioner and heat pump.
- 2 The Climatuff™ coil is all aluminum to resist corrosion from the elements. Eliminating copper tubes also prevents bimetallic corrosion that can reduce the life of the coil.
- 3 The heavy duty coil guard is designed to protect the coil and other components from debris and physical damage.
- 4 A smaller refrigerant charge makes it not only more ecologically friendly, it also increases the XB300's reliability by reducing system stress over time.
- 5 Manual Charge Assist™, a Trane exclusive, helps ensure the proper refrigerant charge, providing ideal performance and efficiency.

A Trane matched system can make you even more comfortable.

By pairing the XB300 with other components found in the Trane family, you can create a truly amazing comfort system and an incredibly comfortable home environment. A single-stage furnace from the **Trane XR series** or a variable-speed furnace from the **Trane XV series** can provide cost-efficient warmth all winter long.

By adding a **Trane CleanEffects™** whole-house air filtration system, the air in your home can be as clean as it is comfortable. CleanEffects removes up to 99.98% of indoor pollutants from the air it filters, including bacteria, pollen, mold and pet dander, and can even reduce your need to dust by up to 50%.

A no-nonsense warranty.

When you build a system this well, a long, straightforward warranty almost seems excessive. But we didn't get to be the most recognized, most reliable brand in home comfort by cutting corners. That's why every XB300 is protected by Trane's ironclad, no-nonsense warranty that upon registration includes 10 years of protection on the Climatuff® compressor, 10 years of protection on the Climatuff™ coil and 5 years of protection on all other parts.
