

TRANE[®]

LET'S GO BEYOND[™]

Connected Building Solutions

*Transforming Hidden Potential through Intelligent Systems,
Building Automation and Energy Management*

IR Ingersoll Rand.

Connect to the New World of Outcome-Driven Buildings

Buildings today are full of hidden potential. They have energy coursing through their veins— heating, cooling, lighting. This energy produces data, and that data is like a language waiting to be translated. Once it is deciphered, it is full of valuable information and insight. When you understand what your building is saying— decode its messages and go beyond the data—you can transform that building into a stronger asset. Your building becomes an asset that can positively impact your goals.

Trane® is the industry leader in Connected Building Solutions.

At Trane, we go beyond unparalleled HVAC systems. Beyond industry-leading automation and energy management solutions. Beyond local engineering expertise. We go beyond basic knowledge to understand how buildings can work better to help businesses succeed.

What can Connected Building Solutions do for you?

Save energy. Save money. Keep people comfortable. Increase uptime. Provide the data you need to make key operational decisions that are aligned to desired business outcomes—and then document the results.

Control your building

When you have better control, your building becomes a more energy efficient and comfortable place to work. Trane provides the sensors, equipment and automation, plus the connective services and expertise you need to collect the data and gain the insight that leads to better control.

Command your building remotely

Building activities ebb and flow all day and night. Our dashboards and mobile interfaces allow you to securely access current information and run systems remotely, giving you more freedom and making you more productive.

Integrate more building systems

In Connected Buildings, everything works together to provide more cohesive communication and integrated management. Trane offers a wide range of scalable applications that simplify the integration of our systems to other building systems— lighting, security and water—both existing and new.

Optimize your building

Nearly any building can run better (and better), and the path to improvement can be found in the data. Once we get connected to the data sources, Trane Intelligent Services can provide the analytics that tell you where your building is running well, where things could be better, and what you can do about it. We can also create the customized reports you need to support your operations.

Connect with Trane advisors

Buildings are increasingly complex, and it takes a team of specialized advisors to make systems work their best. Trane delivers Connected Building Solutions through centralized engineering, combined with local design, installation and service expertise. You can stay connected with Trane on a continuous basis, too: 24/7 monitoring by Trane advisors helps us solve many issues more quickly and efficiently, minimizing the impact on your business.

Start Getting Connected

Trane® offers an unmatched combination of intelligent systems, building automation and energy management. Here's how it all comes together.

ENTERPRISE BUILDING MANAGEMENT

Manage your portfolio of buildings with Tracer® Ensemble™.

BUILDING ENERGY MANAGEMENT SERVICES

Monitor, track and predict energy usage and proactively analyze and optimize performance and maintenance through Trane Intelligent Services.

DESIGN, INSTALLATION, SERVICES EXPERTISE

Get the most from your buildings by leveraging the industry's largest network of Connected Building Solutions experts.

BUILDING AUTOMATION SYSTEMS

Manage, monitor and optimize each building with Tracer® SC. Simplify operation of smaller, standalone buildings with Tracer® Concierge™.

ROOM CONTROL

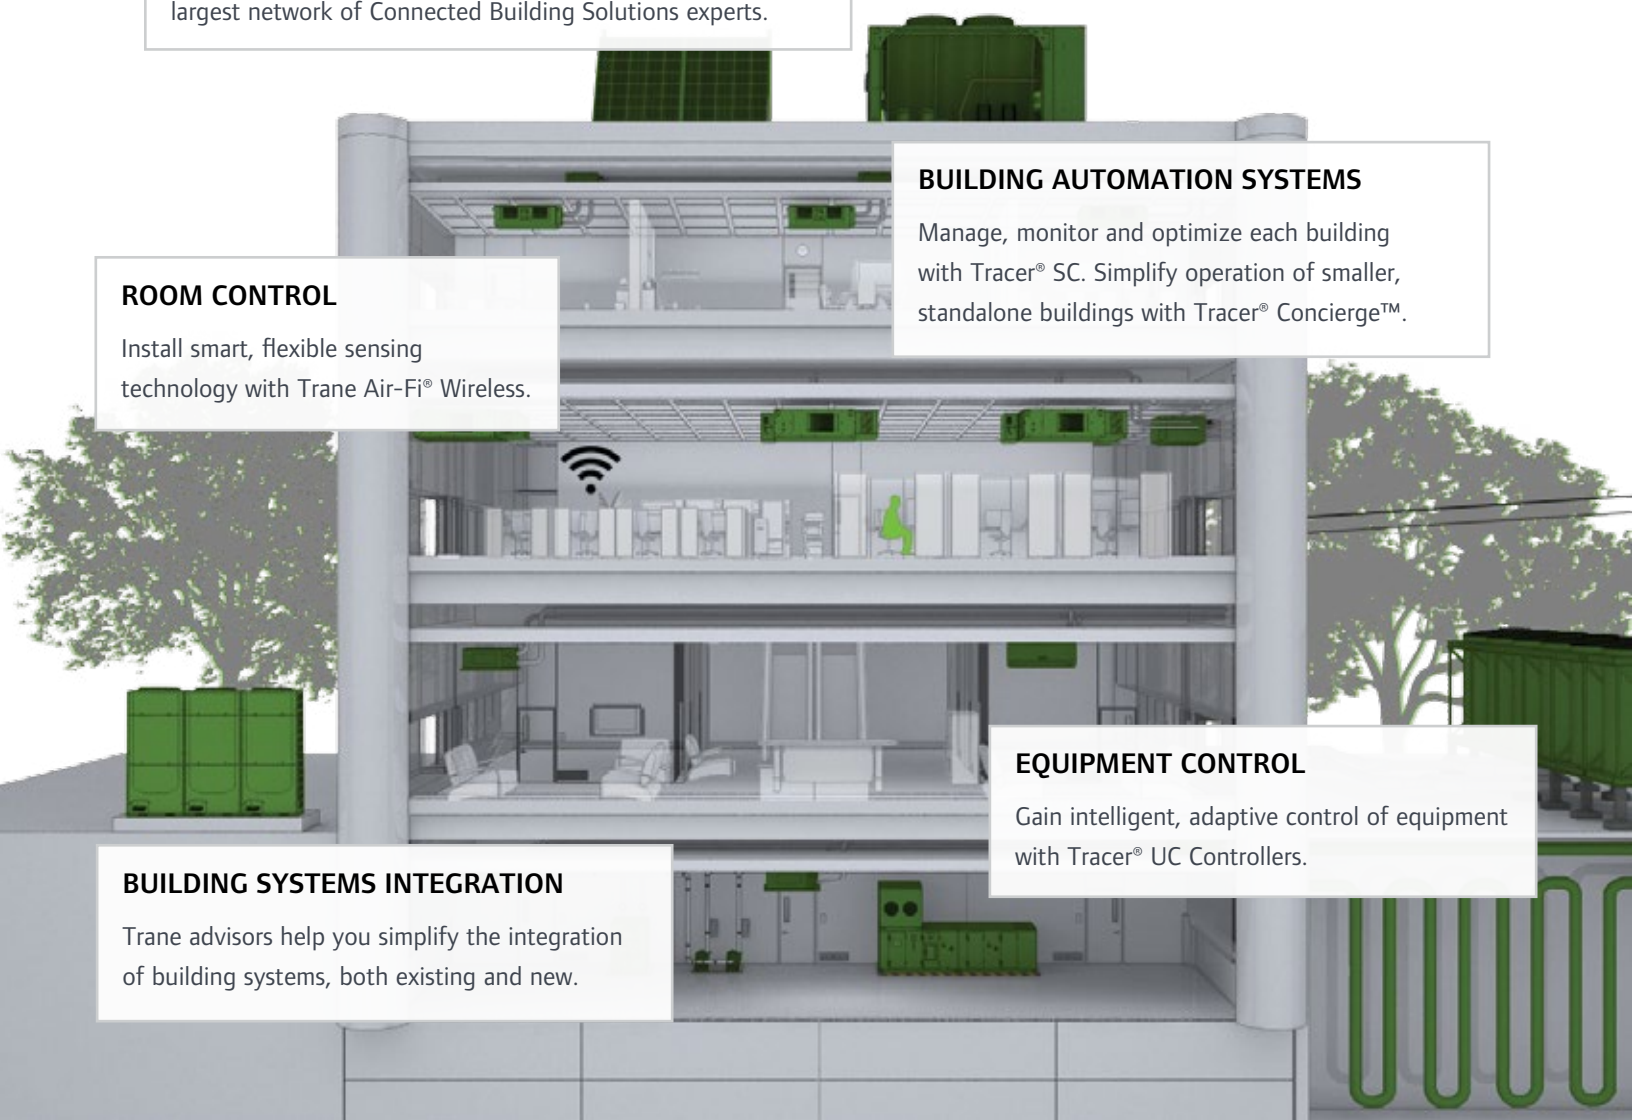

Install smart, flexible sensing technology with Trane Air-Fi® Wireless.

EQUIPMENT CONTROL

Gain intelligent, adaptive control of equipment with Tracer® UC Controllers.

BUILDING SYSTEMS INTEGRATION

Trane advisors help you simplify the integration of building systems, both existing and new.
