

HVAC Systems—Scalable system solutions for maintaining ideal temperature, humidity and CO₂

Optimized Equipment—Ductless, DX, Unitary, Air Handling, Terminal, and Chilled Water Systems

Building Automation Systems—Making precise control easier, mobile and data-rich

Intelligent Services[™]—Monitoring and analytics to optimize your building and minimize unexpected downtime

Energy Services—Managing your energy supply and demand to reduce cost, optimize performance and improve sustainability

Building Services—Reliable, preventative and proactive scheduled maintenance and repair by factory trained technicians

Rental Systems—Promptly provides temporary, scalable HVAC and power from standard applications to complex solutions

Indoor Agriculture

Going beyond seasons for ideal year-round growing

Mother nature knows exactly what plants need to grow and produce. But she doesn't always cooperate. As a leader in advanced HVAC equipment, systems and services, Trane tops nature in providing consistent and reliable growing conditions—indoors. Our solutions give you complete authority over temperature, humidity, CO₂, and airborne pathogens. We put control in your hands, so you can manage—and continually improve—the conditions that maximize the genetic potential of your crop.

Let's go beyond growth.

Let's engineer an environment that differentiates genetic potential, maximizes production and builds long-term ROI. Trane can replicate your proprietary process, and scale it rapidly into multiple buildings as your operations expand. Through decades of experience in thousands of buildings supporting health care, data centers and manufacturing, we've honed the ability to control mission-critical environments.

No tolerance for variability? Leverage technology-driven HVAC systems.

Can't stand swings in humidity? Trane's HVAC systems and digital controls allow you to tightly manage temperature and humidity. Remotely access your systems easily and securely using Trane Connect, including our free mobile apps. And when you're ready to expand, our open architecture makes it easy to integrate with other systems and devices.

Elevating your profitability targets? Look at reducing energy costs.

Energy efficient HVAC systems reduce electricity demand, and your operating costs. We can help on the supply side, too, with professional energy purchasing and sourcing strategies. And by storing energy, you can shift demand to capture lower, off-peak utility rates.

Need boots on the ground support? Engage our service pros.

System downtime is a manageable risk. Our nationwide network of factory trained service professionals and parts centers deliver the hands-on support and speedy response you need. With a service agreement in place, we'll maintain system performance proactively.

Let's go beyond...

Trane makes every day a perfect day for growing. Trane takes a holistic approach to Indoor Agriculture performance. We're combining industry experience, efficient equipment, intelligent services and comprehensive energy services to make growing facilities stronger and more profitable.
