

Trane's 4 Pillars of Building Decarbonization

Reducing direct and indirect emissions

Building Decarbonization Basics

What is it?

Decreasing or eliminating greenhouse gas (GHG) emissions that come from a building.

How can Trane help?

We use a 4-step process that works like this:

Step 1: Collect information to inform our conversation

Step 2: Assess your goals

Step 3: Advise on a plan for decarbonizing

Step 4: Implement and deliver on decarbonization

What do you mean by “pillars”?

Trane organizes decarb solutions into four basic categories—“pillars.”
