Trane® Horizon® Thrive™

Don't Just Grow. Thrive!

Trane Horizon Thrive is a packaged rooftop unit designed specifically to meet the precise dehumidification and temperature requirements for indoor agriculture.

Whatever stage you're in—from up-and-coming startup to established, national brand—Trane Horizon Thrive helps you optimize your indoor growing conditions to help achieve the best crops and highest yield.

Horizon Thrive Grows with You

Trane Horizon Thrive is available in various sizes to meet your unique operational needs—from 3–80 tons—and you can simply add a new unit as your needs evolve. This modular approach, combined with quick lead times, gives you just-in-time scalability; when you're ready to grow, Trane Horizon Thrive will help you do it!

Trane's deep experience and diverse portfolio of equipment and controls mean we can help you in every part of your business—from the grow room to the boardroom.

Trane Horizon Thrive units are energy efficient. Using less energy is good for the earth and lower lifecycle costs are great for your budget.

Quality and Control

You already know the math:
Better Conditions = Better Crops.

Even slight variances in grow room conditions can lead to stunted plant growth, mold and mildew, insects and pests, cross contamination, and even total crop loss.

Trane Horizon Thrive helps you regulate temperature and humidity at the same time, so you can dial in the ideal grow room environment to foster the highest quality plants.

Ready, Set, Yield

What's better than high-quality crops?
More high-quality crops.

When you install a Trane Horizon Thrive rooftop unit, you reserve valuable floor space for growing—but that's not the only way to extract more value from your grow room. Consider adding Tracer® SC+ building automation and Trane Intelligent Services™ to get full, real-time visibility across your operation and insights to help you make better decisions and improve yield over time.

With Tracer SC+, you can take advantage of BACnet-enabled, third-party integrations. Control your HVAC, fertilization, irrigation, and lighting systems from one place!

Trane Horizon Thrive Features:

- Tonnage Range: 3–80
- CFM Range: 500–17,170
- Ultra Low Ambient Operation Down to -10°F (-23°C)
- DX and Water-Sourced Heat Pump Design Options
- Modulating Hot Gas Reheat
- Variable-Capacity Compressors
