

Modular Self-Contained

The ultimate solution to the Commercial Self-Contained replacement market!

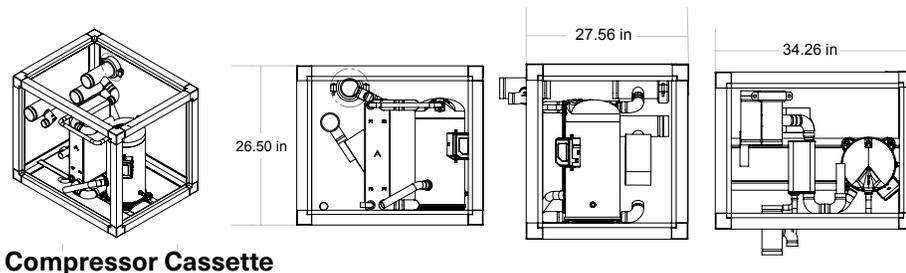

Engineered as the most adaptive self contained footprint and breakdown on the market, the Trane® MSC is perfect for the most demanding installation applications. Designed to fit through a standard commercial doorway or hallway. The Trane MSC specifically meets the needs of the replacement and floor to floor markets!

- 40-80 Ton Offering
- Most Efficient Product on the Market
- Water-Cooled 3 Cassette Breakdown
- Smallest Footprint on the Market
- Variable Speed Compressors
- Variable Speed Plenum Fans
- Trane UC600 Controls
- American Made

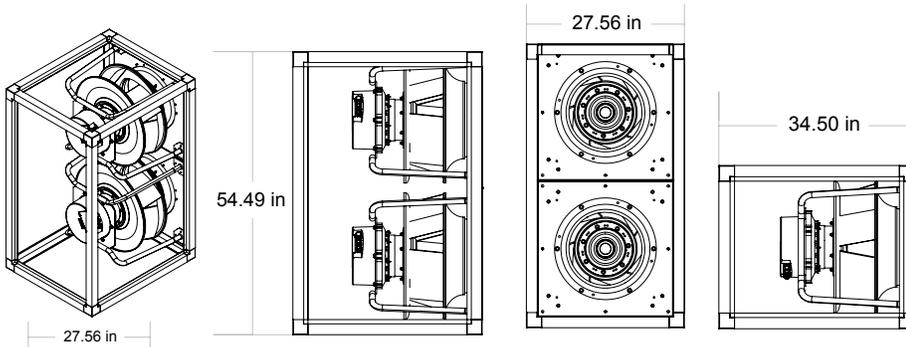

Creating a More Sustainable Future

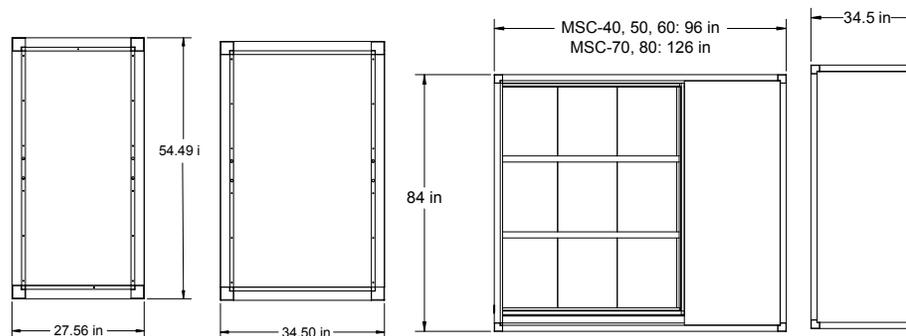

- Unit ships in cassettes for ease in moving into an existing building and mechanical room
- Easy assembly of cassettes with like dimensions for each cassette type
- Cassettes provide smallest sections in the industry for navigation through an existing building
- Unit assembled footprint is as small or smaller than existing unit footprint
- Evaporator cassette knocks down to even smaller dimensions to move coil and cabinet structure into the building

Starter Cassette

Evap Cassette

Trane® Controls

- Trane UC600 controls with TD7 display
- TD7 display provides unit-mounted human interface panel with a two line x 40 character clear language (English) display and a touch screen interface that includes custom, diagnostics, and service test mode menu keys
- Phase reversal protection provided in each compressor - fixed or variable.
- Compressor lead/lag
- Supply air static over pressurization protection on units with variable frequency drives (VFDs)
- Supply airflow proving
- Mappable sensors and setpoint sources
- Occupied/unoccupied switching
- Timed override activation
- Programmable water purge during unoccupied mode
- High entering air temperature limit
- Low entering air temperature limit with waterside economizer.
- Interoperability available with BAC-net communication

Trane – by Trane Technologies (NYSE: TT), a global climate innovator – creates comfortable, energy efficient indoor environments through a broad portfolio of heating, ventilating and air conditioning systems and controls, services, parts and supply.
