

Thermal & Battery Energy Storage

Optimize your energy usage

Heating ventilation air conditioning (HVAC) accounts for **40 percent of energy usage in commercial building**

40%⁽¹⁾

Leveraging energy storage technologies helps **lower operating costs and reduce pressure on the utility grid**

Building Electric Load Profile...

...with Thermal Energy Storage

Leveraging thermal and battery energy storage together optimizes renewable energy usage.

Energy storage increases the use of renewables up to **50%**⁽²⁾

Combining ice and a battery energy storage to address peak demand can reduce the installed energy storage equipment cost by as much as **75%** compared to a battery alone.⁽³⁾

Trane offers a complete portfolio of renewable and energy storage solutions. Contact your local account manager for more details or learn more at trane.com

(1) EIA, 2016 (2) ASHRAE Research Paper: Design and Utilization of Thermal Energy Storage to Increase the Ability of Power Systems to Support Renewable Energy Resources, 2017 (3) Commercial Building Example is based on Calmac analysis as published in Distributed Energy Magazine, January, 2018

Trane – by Trane Technologies (NYSE: TT), a global climate innovator – creates comfortable, energy efficient indoor environments through a broad portfolio of heating, ventilating and air conditioning systems and controls, services, parts and supply. For more information, please visit trane.com or tranetechnologies.com.
