AND TAKE THEM HOME WITH US.

VARIABLE SPEEDS. CONSISTENT COMFORT.

Standard heating and cooling systems are constantly starting and stopping, which can cause uncomfortable temperature fluctuations. Trane’s TruComfort™ Variable Speed air conditioners and heat pumps maintain consistent temperatures in your home by running at lower speeds for longer periods of time—without all the stops and starts. With up to 750 speeds (also known as stages), these units maximize efficiency and minimize electricity use by working at just the right level to keep you comfortable.

As a result, you benefit from:

✓ Better temperature control
✓ Better humidity control
✓ Quieter than traditional systems
✓ Lowest cost per minute
✓ Better air filtration

WHAT IS SEER?

Seasonal Energy Efficiency Ratio (SEER) is an air conditioner’s maximum efficiency rating, similar to the miles per gallon for your car.

WHAT IS HSPF?

Heating Seasonal Performance Factor (HSPF) measures heat pump efficiency during the average heating season. The higher the number, the more efficient the unit.

SEET™ TESTED

Every Trane system is put through some of the most extreme conditions found in nature in our SEET™ [Systems Extreme Environmental Test] lab. Put through five years of severe wear and tear in just a few months, our products can stand up to the harshest environments imaginable.

WE’RE NOT THE ONLY ONES TALKING ABOUT TRANE’S RELIABILITY.

AMERICA’S MOST TRUSTED® HVAC BRAND
7 CONSECUTIVE YEARS¹

MOST RELIABLE HEATING AND COOLING EQUIPMENT BRAND²

A CLOSER LOOK

WeatherGuard™ III Top
Protects internal components with an attractive, durable polycarbonate covering for better reliability.

Exclusive Refrigerant-Cooled Inverter
Keeps electronics at a consistent temperature leading to improved performance and reliability.

Climatuff® Variable Speed Compressor
Serves as the heart of Trane TruComfort™ technology—automatically adjusting itself to maintain constant, consistent comfort.

Compressor Sound Insulators
Reduce operating sound for a quieter home environment.

Full-Sided Powder-Coated Steel Louvered Panels
Provides years of maximum protection against corrosion and rust for internal components, while preserving airflow efficiency.

WeatherGuard™ Zinc-Coated Fasteners
Provide corrosion resistance and longer life, because even minor details are what Trane reliability is all about.

Integrated Fan System
Improves airflow, enhances performance, and reduces sound levels with a blade-down design.

Exclusive All-Aluminum Spine Fin™ Woven Coils
Enhance airflow and heat transfer while resisting corrosion and leaks, offering better reliability than traditional copper and aluminum coils.

ComfortLink® II Communicating Controls
Enable the thermostat, the indoor unit and the outdoor unit to communicate with each other, maximizing system efficiency, comfort, and reliability.

Simplified Two-Wire Connection
Allows for easier installation while reducing the need for structural modifications.

DuraTuff™ Rustproof Basepan
Won’t crack, corrode, rust or warp.

The XV20i heat pump shown is for illustration purposes only. Please note that features and components may vary by model. As part of our continuous product improvement, Trane reserves the right to change specifications and design without notice.

* XV20i/XV18/XV19 vary speed in 1/10 of 1% increments.
** 2 & 3 ton have 500 stages, 4 ton has 650 stages, 5 ton has 700 stages
^ 2 & 3 ton are 50–100%, 4 ton is 35–100%, 5 ton is 30–100%
WE ARE COMMITTED TO USING ENVIRONMENTALLY FRIENDLY PRINTING PRACTICES.

Independent Trane dealers take great pride in creating your perfect indoor environment. They are some of the most highly trained professionals in the business with an extensive understanding of the movement and conditioning of air and the expertise to recommend, install, and maintain the right system for your home.
